

Mini Magnetic Lock

User Manual

CE FC RoHS

Read the manual before usage and keep for future reference.

1. Function

1. Handle it with care, any damage for the iron plate or magnet surface, will decrease the holding force.
2. Fasten the magnetic lock with the door frame, make sure the iron plate can tilt around the it to compensate for misalignment error of door.
3. The working voltage is 12VDC/DC24V.

2. Technical parameter

- | | |
|--------------------------|---|
| ◆ Input Voltage: DC12V | ◆ Lock Size: 80L*37W*24H(mm) |
| ◆ Start current: 300mA | ◆ Armature Plate Dimension: 70L*33W*9H(mm) |
| ◆ Working current: 120mA | ◆ Holding Force: 60KG(120Lbs) |
| ◆ Time delay: 0S | ◆ Door Type Applicable: File Cabinet, Display Cabinet |
| ◆ Door signal: No | ◆ Security Type: Power off to open |
| ◆ Lock signal: No | ◆ Weight: 0.6KG |

3. Product size

Remark:

Please don't fix the screw (screw of armature plate) tightly, let the rubber ring maintain proper elasticity.
